# Django Admin

# Django Admin Register İşlemi

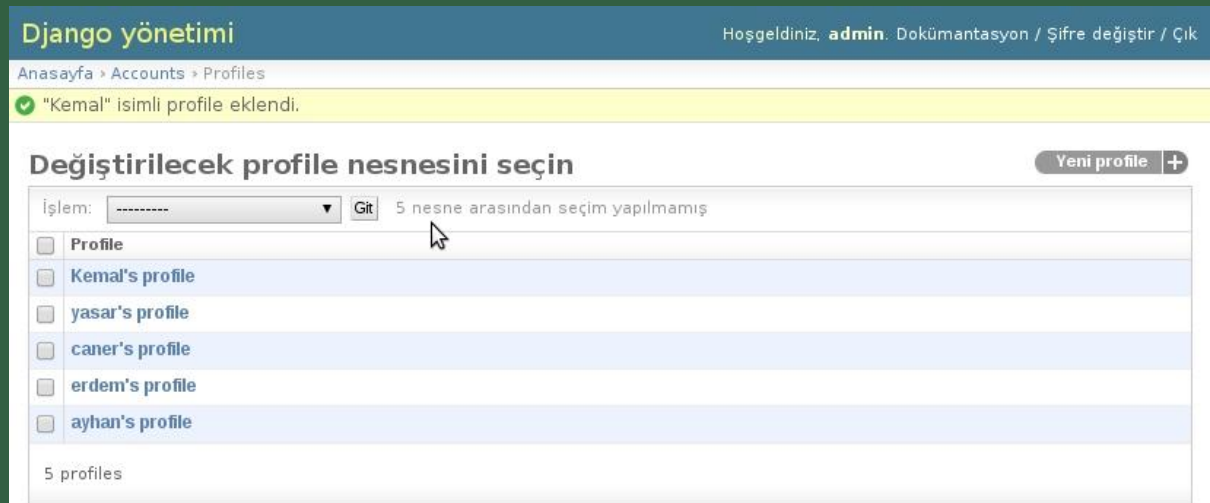

Her uygulamanın panel yönetimi admin.py dosyasından yapılır. Admin register işlemini yaptığımız dosyaya başka isim veremeyiz.

admin.py

```
from django.contrib import admin
from accounts.models import Profile

admin.site.register(Profile)
```

# Peki Django Admin Uygulamasını Nasıl Düzenlerim?

Django Admin

Welcome, Evan Byrne

Django admin de düzenlemeyi django'nun **ModelAdmin** class'ını override ederek ve admin **template**'lerini düzenleyerek yaparız.

# ModelAdmin Overriding

```
from django.contrib import admin
from accounts.models import Profile

class ProfileAdmin(admin.ModelAdmin):
    list_display = ('user', 'point')
    list_filter = ('user',)

admin.site.register(Profile, ProfileAdmin)
```

**Django yönetimi** Hoşgeldiniz, **admin**. Dokümantasyon / Şifre değiştir / Çık

Anasayfa > Accounts > Profiles

## Değiştirilecek profile nesnesini seçin

İşlem:   5 nesne arasından seçim yapılmamış

<input type="checkbox"/>	User	Point
<input type="checkbox"/>	Kemal	85,00
<input type="checkbox"/>	yasar	50,00
<input type="checkbox"/>	caner	20,00
<input type="checkbox"/>	erdem	10,00
<input type="checkbox"/>	ayhan	0,00

5 profiles

**Filtrele**

**user filtresi**

- Tümü
- admin
- ayhan
- erdem
- caner
- yasar
- Kemal
